EDUCATION

JECRC University

B.Tech in Computer Science and Engineering – CGPA: 8.1

Jaipur, Rajasthan

2022 – 2026

EXPERIENCE

Pre-Onboarding Trainee (Analyst – A4)

Capgemini Technology Services India Ltd.

Jan 2026 – Present

Jaipur, India

- Selected competitively for the Analyst (A4) role out of a national hiring pool at a Fortune 500 enterprise.
- Completing structured, enterprise-grade technical training aligned with client delivery and software development standards.
- Developing proficiency in consulting workflows, data-driven problem solving, and professional engineering practices.

Data Analytics and Forensic Technology Intern

Deloitte Australia – Virtual Internship

June 2025

Remote

- Analyzed and processed 10,000+ records using Python (Pandas), Matplotlib, and Power BI, improving data accuracy by ~35% and reducing manual effort by ~40%.
- Built interactive Power BI dashboards with drill-down analysis to support forensic investigations and stakeholder decisions.

PROJECTS

AI Code Review Bot | *Python, Groq API, LLaMA 3.3, GitHub Actions, REST APIs* | [GitHub](#)

- Built an autonomous CI/CD bot that triggers on every GitHub Pull Request and posts AI-generated code reviews instantly, eliminating manual review bottlenecks with zero human intervention.
- Integrated LLaMA 3.3 70B via Groq API to detect bugs, security vulnerabilities, and code quality issues; automated full deployment pipeline using GitHub Actions.

Mocker – Exam Mock Test Platform | *JavaScript, TypeScript, Next.js, HTML, CSS, MySQL* | [Live App](#)

- Built a full-stack web platform with responsive UI and dynamic routing, supporting mock exams, dashboards, and result analysis for students.
- Implemented authentication, structured data storage, and reusable components following clean code practices; designed analytics views with charts to track performance and accuracy over time.

Flavor Scout Engine | *Python, Streamlit, Pandas, LLM APIs* | [Live App](#) | [GitHub](#)

- Built an AI-driven decision engine that converts unstructured social media feedback into structured flavor recommendations, reducing decision ambiguity by ~40%.
- Implemented explainable KPI-based scoring logic (trend strength, sentiment, brand fit) to improve clarity and consistency in product launch decisions.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript

Frameworks & Libraries: Next.js, Streamlit, Tkinter, Playwright

AI & Automation: LLM Integration, Prompt Engineering, GitHub Actions, REST APIs, CI/CD Automation

Databases: MySQL, PostgreSQL, MongoDB, Prisma ORM

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI

Tools & Practices: Git, GitHub, Jupyter Notebook, OOP, DBMS, SDLC, Team Collaboration

ACHIEVEMENTS

Top 20 University Finalist – Smart India Hackathon 2024 (Software Edition).

Core Team Member – Devcrest JU; organized contests and mentorship for a 230+ member coding community.

CERTIFICATIONS

Google Cloud Computing Foundations – Google Cloud
