SUMMARY

Software Engineer (B.Tech CSE, 2026) building TypeScript test automation with Playwright, BDD, and Jenkins CI/CD for a banking application, plus full-stack and AI-powered projects in Next.js, Prisma, Python, and LLM APIs. Experienced in taking products from requirements to live deployment, with strong foundations in API and UI testing and CI/CD. Holds Google Cloud and IIBA-endorsed business analysis certifications.

EDUCATION

JECRC University

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.1

Jaipur, Rajasthan

2022 – 2026

PROJECTS

ParaBank Automation Framework | *Playwright, TypeScript, Allure, Jenkins*

[GitHub](#)

- Built an end-to-end test framework for the ParaBank demo banking app covering UI, API, and hybrid (UI-to-API) flows, with 11 spec files mapped to requirements FR-01 to FR-09 and traced through an RTM.
- Structured the suite with the Page Object Model, API fixtures, JSON test data, and tag-based runs (@smoke, @regression, @api, @e2e), running in parallel on Chromium and Firefox with retries.
- Automated CI with a Jenkins pipeline that archives screenshots, videos, and traces and publishes Allure and Playwright HTML reports for every build.

Mocker – Exam Mock Test Platform | *Next.js, TypeScript, Tailwind CSS, Prisma, Clerk, Recharts*

[Live App](#) | [GitHub](#)

- Developed a full-stack mock test platform with CAT and GATE mocks and an extensible TECH category, with Clerk authentication and user-specific dashboards, deployed on Vercel.
- Built an exam engine with full-screen enforcement, tab-switch detection, auto-submit after 3 violations, a timer, and a question palette for visited, answered, and marked-for-review questions.
- Persisted results with Prisma and built analytics (accuracy, time taken, correct/wrong/unattempted) with pie and line charts, plus a post-exam answer review.

Noise2Signal | *Python, Streamlit, Pandas, Groq API, LLaMA 3.1*

[Live App](#) | [GitHub](#)

- Performed requirement and gap analysis to refactor a single-brand tool into a domain-agnostic engine redeployed across three business categories with zero changes to core logic, shipped as a live Streamlit app.
- Converted unstructured YouTube comments into an explainable ACCEPT/REJECT process via a weighted four-component scoring model, reducing decision ambiguity by ~40% and cutting turnaround time by 30–35%.
- Added grounding and vocabulary filters that validate every LLM-extracted item against the source text to discard hallucinations.

EXPERIENCE

Software Engineer

Aug 2026 – Present

Capgemini

- Engineered an automation framework in TypeScript using Playwright and BDD (Cucumber) with the Page Object Model, replacing repetitive manual work with modular, reusable and repeatable runs.
- Translated functional requirements of a banking application into structured workflows across UI, API, and hybrid (UI-to-API) flows, validating request/response accuracy across services.
- Shipped changes through a Jenkins CI/CD pipeline with Allure reporting, giving the whole team continuous visibility into build status and defects.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frameworks & AI: Next.js, Tailwind CSS, Framer Motion, Recharts, Prisma, Clerk, Streamlit, Pandas, LLM APIs (Groq, LLaMA)

Testing & Automation: Playwright, BDD (Cucumber), Page Object Model, API Testing, Postman, Allure

DevOps & Tools: Jenkins, GitHub Actions, CI/CD, Git, GitHub, Vercel, Google Cloud Platform, JIRA

Databases & Analytics: MySQL, PostgreSQL, MongoDB, Power BI, DAX, Tableau, Excel, Data Cleaning, EDA

Practices: Requirement Gathering, Gap Analysis, Process Documentation, Root Cause Analysis, Stakeholder Communication

ACHIEVEMENTS & CERTIFICATIONS

Top 20 University Finalist – Smart India Hackathon 2024 (Software Edition).

Core Team Member – Devcrest JU: organized contests and mentorship for a 230+ member coding community.

Google Cloud Computing Foundations – Google Cloud.

Plan the Project as a Business Analyst & Business Analysis Fundamentals (IIBA Endorsed) – Udemy (Oct 2026).

Deloitte Australia Data Analytics Job Simulation – Forage (June 2025).
